

Jack Daniel's Tennessee Honey Slim Shot Installation Instructions

Remove the Slim Shot unit from the shipping carton and inspect for shipping damage. If shipping damage is found immediately contact Sentry BevCon at 800 661-3003. Do not discard the shipping carton or any shipping materials in the event a freight claim must be filed.

1. The following parts are included with this Shipment.
2. Find a convenient location to place your Slim Shot unit. Place Chiller Mat in front of unit.
3. **DO NOT PLUG YOUR UNIT INTO AN ELECTRICAL OUTLET AT THIS TIME.**

4. Install both stainless steel strainers in bottle reserves.

5. Slip the corks over the bottle caps then slip these assemblies into the Jack Daniel's Tennessee Honey bottles.

**Note: Left Button - Front Bottle
Right Button - Rear Bottle**

6. Turn the Tennessee Honey bottles upside down and place them into the bottle reserves. Adjust the support assemblies to stabilize the bottles.
7. Plug the unit into a 110 volt outlet. The refrigeration system will automatically start. If refrigeration does not start go to step #11.

8. Activate the "PUSH" switch until the Tennessee Honey is dispensed. The level of the Tennessee Honey in the bottles will drop as the cooling coils are filled. Dispense 6 to 8 ounces in order to flush the unit.

DO NOT REUSE THIS LIQUOR!

9. In approximately 40 to 60 minutes the unit will dispense ice-cold Tennessee honey shots.

10. Place a Tennessee Honey bottle in the top front-lighted bottle tray for merchandising.

11. Your unit is equipped with an on/off switch for the refrigeration. This switch should be in the on position during normal operation. Only put switch in the off position for flushing/cleaning. If unit does not chill check to make sure switch is in the on position.
